

SKIP SIMPSON

With a legal background ranging from duties as a U.S. Air Force Courts Martial Judge to serving as Texas' top drug traffic prosecutor, Skip Simpson has created a private law practice that has covered a wide range of intriguing matters both civil and criminal. Now, he has limited his practice primarily to psychiatric and psychological malpractice.

Nationally recognized for his expertise in suicide and repressed memory cases, Mr. Simpson and his unique law firm are featured in C.C. Risenhoover's book *The Suicide Lawyers: Exposing Lethal Secrets* which each of you have been provided. The author explains that, "unlike psychiatrists, Mr. Simpson has to look at suicide from every possible angle in preparing a case, and he has to make his findings easily understandable to a jury...after reading this book the reader will not be one of the many Americans who, after the suicide of a loved one or friend, says, If I had only known..."

Following his interest in psychology, he's become one of the nation's ranking experts on prosecuting suicide cases. He is now a board member of the American Association of Suicidology and is a former adjunct associate professor in the department of psychiatry at UT Health San Antonio.
